GPT-6.1 Sol

Default

Near-Astra performance for complex work at a lower cost.

Compare | Try in Playground

Reasoning	●●●●●
Speed	⚡⚡⚡⚡
Price	$2 · $10
Input	T, image
Output	T

GPT-6.1 Sol delivers near-Astra performance at a lower cost for complex coding, computer use, and professional work. Compare it with Astra on your tasks to assess the tradeoff between quality and cost.

`reasoning.effort` supports `low`, `medium` (default), `high`, `xhigh`, and `max`. The `none` and `minimal` reasoning efforts are not supported.

Use the Responses API for tool calling. Chat Completions is supported without tool calling.

GPT-6.1 Sol supports US and EU data residency. Fast mode is unavailable with EU data residency. See data residency eligibility.

See GPT-6.1 Sol in the GPT-6 guide and model-selection guidance.
