SOVEREIGN NON-DISCLOSURE & AIR-GAPPED DATA INGESTION AGREEMENT

Bilateral Protocol for Adversarial R&D Auditing and Zero-Cloud Sandboxed Ingestion

Document Reference: `SENTINARI-SNDA-2026-V1`

Standard: ISO/IEC 27001 Aligned • Air-Gapped Sovereign Computing Protocol

Principal Investigator: Dr. Pierre C. Wepener, PhD

Institution: Sentinari Applied Research & Pseudo-Dynamics Laboratory

---

PREAMBLE & STATEMENT OF INTENT

This Sovereign Non-Disclosure and Data Ingestion Agreement ("Agreement") is entered into as of the Effective Date by and between:

- **THE DISCLOSING PARTY:** [Client Enterprise Name / Legal Entity], having its principal place of business at [Client Corporate Address] (hereinafter referred to as the **"Enterprise Partner"**); and
- **THE RECEIVING PARTY:** Sentinari Applied Research, represented by its Chief Architect, **Dr. Pierre C. Wepener, PhD**, residing and operating in Johannesburg, South Africa (hereinafter referred to as **"Sentinari"**).

The Enterprise Partner and Sentinari may individually be referred to as a **"Party"** and collectively as the **"Parties"**.

WHEREAS, the Enterprise Partner desires to submit a persistent, complex, or unsolved scientific, algorithmic, or engineering bottleneck to Sentinari under the **4-Hour Adversarial R&D Challenge**; and

WHEREAS, Sentinari operates an offline, domain-agnostic cross-functional pattern discovery engine specifically designed to process, analyze, and stress-test technical challenges without relying on external cloud APIs or public model training;

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the Parties agree to the following rigorous sovereign protocols:

ARTICLE 1: DEFINITIONS & AXIOMATIC CLASSIFICATION

1.1 "Proprietary Ingestion Data" means all technical specifications, mathematical parameters, failure logs, chemical/molecular structures, CAD bounds, finite element meshes, sensor telemetry, source code, and empirical documentation disclosed by the Enterprise Partner to Sentinari for the purpose of the 4-Hour Challenge.

1.2 "Axiomatic Invariants" means universal, non-proprietary principles of mathematics, physics, thermodynamics, information theory, and statistics that govern physical reality (e.g., Navier-Stokes equations, Shannon entropy, sorted array invariants, Gaussian distributions). Axiomatic Invariants are not proprietary to either Party.

1.3 "Sovereign Air-Gapped Environment" means a dedicated, physically isolated computing infrastructure operated locally by Sentinari, possessing zero outbound network sockets to public large language model (LLM) APIs, zero third-party telemetry monitors, and full cryptographic memory sandboxing.

1.4 "Validation Deliverable" means the formal 15-to-18-page publication-grade R&D Validation Paper, KaTeX mathematical proofs, and executable simulation prototype models (Python/MATLAB) generated by Sentinari during the 4-hour audit.

ARTICLE 2: THE SOVEREIGN ZERO-CLOUD TRANSMISSION COVENANT

2.1 Strict Zero-Cloud Policy: Sentinari contractually covenants and warrants that Proprietary Ingestion Data:

- Shall **never** be transmitted, routed, mirrored, or cached across any commercial public cloud API (including, but not limited to, OpenAI, Anthropic, Google Cloud Vertex public endpoints, Microsoft Azure Cognitive Services, or Amazon Web Services).
- Shall be computed exclusively within a local, air-gapped environment utilizing locally instantiated models (e.g., offline Gemma models, local Pseudo-Dynamics tensor engines).

2.2 Cryptographic Isolation & Memory Sandboxing:

- Upon receipt, all submitted data is ingested through the *Gateway Guardian* filter, assigned a unique SHA-256 cryptographic digest, and placed into an isolated runtime workspace.
- Outbound networking is strictly restricted to ensure zero telemetry leakage during the entirety of the 4-hour adversarial processing cycle.

ARTICLE 3: STRICT NON-TRAINING & MODEL RETENTION BAN

3.1 Zero Foundation Model Training: Sentinari unequivocally warrants that no portion of the Enterprise Partner's Proprietary Ingestion Data, whether raw, preprocessed, or synthesized, shall ever be used to:

- Pre-train, fine-tune, or adjust weights of any foundation model, neural network, or algorithmic database accessible to third parties or future clients.
- Enhance public open-source or proprietary models.

3.2 Ephemeral Processing & Cryptographic Purge:

- The Enterprise Partner's raw input files exist in volatile local storage solely for the duration required to complete the 4-hour audit and compile the Validation Deliverable.
- Within seventy-two (72) hours following delivery of the validation paper, Sentinari will permanently wipe and cryptographically purge all raw working telemetry from local disk storage, retaining only the delivered validation report for archive verification, unless explicitly requested otherwise by the Enterprise Partner.

- A signed **Cryptographic Certificate of Destruction** verifying the SHA-256 wipe will be provided upon written request.

ARTICLE 4: INTELLECTUAL PROPERTY & UNENCUMBERED CLIENT OWNERSHIP

4.1 100% Client Ownership of Remediations & Discoveries:

All discoveries, novel mathematical formulations, root-cause elucidations, suggested architectural corrections, and executable simulation prototypes (Python and MATLAB scripts) generated by Sentinari that directly derive from the Enterprise Partner's problem space shall be the **sole, exclusive, and unencumbered Intellectual Property of the Enterprise Partner**.

4.2 Patentable Subject Matter:

The Enterprise Partner retains the unfettered, royalty-free right to patent, commercialize, publish, or implement any technical advance, material modification, or workflow remediation articulated in the deliverable paper. Sentinari claims zero royalty, zero equity, and zero trailing ownership over client implementations.

4.3 Sentinari Pre-Existing IP Preservation:

Sentinari retains sole and exclusive ownership of its pre-existing, domain-agnostic software architecture, the 7-Dimensional Assessment Matrix equations, the Pseudo-Dynamics Laboratory core simulator, the 15-indicator paper generation engine, and the underlying mathematical scoring rubrics ($NSIS = \sum W_i S_i(x_i)$).

ARTICLE 5: PERMITTED ANONYMIZATION PROTOCOL

5.1 Enterprise Data Sanitization Right:

The Enterprise Partner is explicitly encouraged and permitted to sanitize, abstract, or anonymize its Proprietary Ingestion Data prior to transmission. Sentinari's adversarial pattern recognition engine operates on pure physical, numerical, and structural relationships; therefore:

- Commercial product brand names may be replaced with arbitrary identifiers (e.g., `Component_Alpha`).
- Absolute operational magnitudes may be normalized against non-dimensional ratios (e.g., x / x_{max}).
- Exact proprietary chemical designations may be abstracted to functional classifications and stoichiometric constraints.

5.2 Sufficient Technical Resolution:

The Enterprise Partner agrees to preserve sufficient mathematical, dimensional, and thermodynamic fidelity to permit rigorous axiomatic stress-testing.

ARTICLE 6: CONFIDENTIALITY TERM & COMPLIANCE

6.1 Term of Obligation:

The obligations of confidentiality under this Agreement shall endure for a period of **five (5) years** from the date of disclosure, or until such time as the Proprietary Ingestion Data enters the public domain through no fault or breach of Sentinari.

6.2 Standard of Care:

Sentinari shall protect the Enterprise Partner's confidential information with the same degree of care, but not less than a reasonable degree of care, that it exercises to protect its own proprietary scientific frameworks and trade secrets.

ARTICLE 7: DISPUTE RESOLUTION & PROFESSIONAL ATTESTATION

7.1 Governing Law:

This Agreement shall be governed by and construed in accordance with the laws of South Africa (or mutually agreed neutral international arbitration, such as the International Chamber of Commerce - ICC).

7.2 Professional Ethical Attestation:

This Agreement is personally countersigned and ethically guaranteed by **Dr. Pierre C. Wepener, PhD**, under the professional standards of scientific research integrity, academic peer review ethics, and industrial psychology governance.

EXECUTION AND COUNTERSIGNATURE

IN WITNESS WHEREOF, the Parties have executed this Sovereign Non-Disclosure and Air-Gapped Data Ingestion Agreement as of the date written below.

FOR THE ENTERPRISE PARTNER:

Entity Name: _____

Authorized Signatory: _____

Title: _____

Date: _____

Signature: _____

FOR SENTINARI APPLIED RESEARCH:

Entity: Sentinari Applied Research & Pseudo-Dynamics Laboratory

Authorized Signatory: Dr. Pierre C. Wepener, PhD

Title: Chief Architect & Principal Investigator

Date: November 3, 2026

Digital SHA-256 Authentication:

`4F9A-7B2C-881E-903D-SENTINARI-SOVEREIGN-VERIFIED`

Signature: _____

(End of Sovereign Ingestion NDA & Sandboxed Protocol Agreement)
